Positive COVID-19 Test Results

Bonneville County Case: We are reporting a positive COVID-19 test result for a male in his 50s. This individual was not hospitalized and is recovering at home. The case has no recent travel history or contact with a confirmed COVID-19 case. Therefore, community spread of COVID-19 is identified.

Teton County Case: We are reporting a positive COVID-19 test result for a male in his 40s. This individual was not hospitalized and is recovering at home. The case has no recent travel history or contact with a confirmed COVID-19 case. Therefore, community spread of COVID-19 is identified.

Epidemiologists with EIPH are investigating both cases. If other people are found to be exposed, health officials will contact them, provide them guidance, and monitor them closely for symptoms. Additional case-specific information about these individuals is confidential and will not be released.

COVID-19 Case Counts/County

County	Cases
Bonneville*	6
Clark	0
Custer	2
Fremont	1
Jefferson*	3
Lemhi	0
Madison*	4
Teton*	4
Total	20

*Indicates community transmission of COVID-19.

COVID-19 Q & A of the Day

Question: How do I wash my hands effectively?

Answer: Hand washing is one of the best ways to stop the spread of germs. Following are some pointers for effective hand washing.

- Wash your hands often with soap and water for at least 20 seconds, especially before eating; after blowing your nose, coughing, or sneezing; and using the restroom. Pay close attention to under your fingernails and between your fingers.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry.
- The [CDC's handwashing website](https://www.cdc.gov/handwashing) has detailed instructions and a video about effective handwashing. Now is a great time to watch this as a family and start or continue this habit that will help keep you healthy for a lifetime.
